

Vouvry, 30th November 2017

We are well aware of the Reach regulation for the **Registration, Evaluation, Authorization and restriction of CHemicals** that has entered into effect on June 1st, 2007.

Microprecision Electronics SA neither produces nor imports directly substances that are concerned by REACH. Microprecision Electronics SA has, therefore, no obligation to pre-register and/or register any substances or establish "security data sheets".

Microprecision Electronics SA is neither a producer of raw material nor a Chemical supplier but we commit to ask our suppliers to be in compliance with the material we use to manufacture our products.

Microprecision Electronics SA has put in place a procedure towards its suppliers and we will be communicating further with our own suppliers and customers to gather the information that we will need to ensure compliance in a timely manner.

Furthermore, we herewith confirm that our products do not contain more than 0.1% (w/w) of any of the mentioned substances on the published candidate list (SVHC) from ECHA. We also confirm that our products will be harmonized with future extensions (updates) of the published candidate list from ECHA, and we will immediately inform the customer should our products contain any of the new substances added to the list.

Microprecision Electronics SA

Alvaro Belogi
QA Manager

A blue ink signature of Alvaro Belogi, consisting of several overlapping loops and a long horizontal stroke at the end.

Vito Carrea
RD & Production Manager

A blue ink signature of Vito Carrea, featuring a series of horizontal, wavy lines with a long, sweeping underline.
